

I urge you to reject the petition 04-160 from the National Association of Broadcasters. I pay for XM radio because they provide the service I want and therefore meet my needs tremendously. I also pay for Dishnetwork and they do not have to abide or be forced to not offer local content. I think satellite radio should be held in the same arena. If paid for then they can deliver whatever content they choose. I chose XM because they don't have stupid commercials and constant remarks about how they are better than the other stations. Please do not take my rights away for something I pay for. Thanks
Mark Boudoin
